## Projects

### UX/UI Designer – CareerFoundry Project

Thrive Savings App | February 2025 – present

- Applied design thinking and mobile-first principles to develop a financial wellness app.
- Created user flows, journey maps, and interactive prototypes to address savings pain points.
- Conducted usability testing, analyzed findings, and refined designs through iterative sprints.
- Built a responsive web app and presented the project using a complete design system.

## Experience

### Sodexo

Admin Assistant/ Baker/ Culinary Coordinator | 12/2021 – present

- Conducted financial reporting through Evison and UFS, identifying trends and aligning planning with business goals
- Managed payroll operations in Kronos while supporting day-to-day administration
- Created digital menus and seasonal campaigns in Drive
- Designed and executed marketing materials for unit-wide and corporate events, building engagement strategies that balance visual design with user needs.
- Increased sales by \$20,000 by leveraging user feedback to enhance offerings—applying data-driven iteration and service design.
- Supported the hiring process, collaborating across departments and ensuring new hires aligned with operational and service goals

### Blissful Spoon

Pastry Chef | 12/2020 – 12/2021

- Created structured schedules and onboarding systems for kitchen staff to ensure smooth daily operations
- Designed and tested new product lines (gluten-free dessert recipes), iterating based on A/B testing feedback
- Led staff training with a focus on autonomy and collaboration, fostering a culture of open communication
- Developed specialty menus for seasonal events, aligning creative output with customer expectations which increased sales of baked items.
- Contributed to expanding the brand's dessert line, enhancing the customer experience and helping the business grow

### 900 Wall

Prep Cook/ Assistant Pastry Chef | 09/2019 - 03/2021

- Adapted quickly to shifting team needs, assisting line cooks with prep work before transitioning into independently managed pastry responsibilities
- Managed daily production cycles with attention to detail, quality control, and efficiency under constraints—skills essential in UI prototyping.
- Owned the full pastry prep cycle, from start to finish, ensuring quality and consistency across all product
- Performed informal quality assurance checks on both team and solo output, maintaining high standards under time pressure—translating to attention to detail and iterative improvement in the design process.

### Big Ed's

Bread Baker | 09/2019 - 03/2021

- Pioneered and scaled a brand-new pastry program, taking full ownership of its development
- Created a centralized recipe system using Google Docs, improving collaboration, version control, and accessibility
- Developed adaptable recipe templates with variable yield inputs, offering flexible outputs based on user needs
- Maintained production timelines and enforced high-quality standards

### Umpqua Bank

Universal Associate | 02/2017 - 12/2018

- Provided direct customer support in a high-trust environment, helping clients manage financial transactions while upholding brand standards
- Maintained accuracy under pressure while handling cash and financial records, demonstrating attention to detail, consistency, and process reliability
- Communicated clearly and empathetically to resolve questions or concerns, ensuring a positive user experience

### Cupcake Jones

Bakery Manager/ Business Consultant | 08/2008 - 02/2017

- Launched two new product lines—a vegan/gluten-free cupcake collection and a custom cake program that was deadline driven, which increases sales
- Researched and implemented new strategies to increase revenue and reduce labor costs, helping prepare the business for acquisition
- Spearheaded the implementation of a new POS system, improving internal workflows and customer experience
- Helped open a second retail location, supporting brand scalability and operational rollout which allowed the business more visibility in Portland.
- Balanced creative innovation with operational strategy, managing both customer experience and backend efficiency
