Elevator Pitch:

Hi, I'm transitioning into UI design after a long career as a Pastry Chef and General Manager in the food and hospitality industry. That background gave me a deep appreciation for precision, creativity, and delivering high-quality results under pressure—skills that translate surprisingly well into design. I've recently completed a UI/UX program where I focused on Figma, UX research, and responsive wireframes, and one of my final projects was even selected for student submission. I'm especially passionate about creating designs that are both functional and visually engaging, and I'm currently looking for opportunities where I can keep learning and contribute to great user experiences. I'd love to connect if you know of any teams that could benefit from a fresh perspective and strong problem-solving mindset.

Resume Summary:

A former Pastry Chef and General Manager turned UI designer, bringing a strong foundation in UX research, responsive wireframes, and Figma—paired with creativity, precision, and a proven ability to perform under pressure. Known for delivering thoughtful, user-focused solutions with a collaborative, problem-solving mindset.

LinkedIn Summary:

Aspiring UI/UX Designer | Creative Problem-Solver with a Hospitality Edge

I'm a UI/UX designer with a background in the food and hospitality industry, where I worked for over a decade as a pastry chef, general manager, and operations lead. My past experience honed my ability to manage complex workflows, multitask under pressure, and deliver high-quality, customer-focused outcomes—skills I now bring into user interface design.

Through formal training in UI/UX design, I've built a strong foundation in Figma, wireframing, UX research, and responsive web design. I especially enjoy creating clean, functional interfaces that solve real problems and improve user experiences. I thrive in collaborative environments, value constructive feedback, and love working on projects that challenge me to learn and grow.

I'm currently looking for full-time remote opportunities where I can apply my skills, bring a fresh perspective, and contribute to impactful digital experiences.

Core Skills:

- Figma & UI component creation

- UX Research & Journey Mapping

- Responsive Web Design

- Wireframing

- Project Management & Time Prioritization

- Collaboration & Feedback Integration

- Creative Problem Solving

- Attention to Detail & Consistency
